

2010 NESCAUM Analysis
List of Potential GHG Reduction Strategies Analyzed

Transportation and Land Use

1. **Continued participation in the California Low Emission Vehicle Program, including the GHG emission standards for light-duty vehicles**
2. **Light-duty vehicle feebate program**
3. **Low carbon fuel standard**
4. **Smart growth strategies**
5. **Vehicle Miles Traveled (VMT) reduction**
6. **Speed limits**
7. **Clean diesel programs**

Electric Power Generation

1. **Implement and/or strengthen the Connecticut Renewable Portfolio Standard**
2. **Expand and/or extend the Regional Greenhouse Gas Initiative (RGGI)**
3. **Base-load carbon dioxide (CO₂) performance standard**

Residential, Commercial, and Industrial Energy

1. **Maximize energy efficiency potential from the Connecticut Energy Efficiency Fund, Natural Gas Efficiency Fund, and Fuel Oil Conservation Fund**
2. **Appliance standards**
3. **Building codes**
4. **Maximize energy efficiency potential as identified in a prior state survey**
5. **Heat pumps**
6. **Weatherization**
7. **Smart meters**
8. **High global warming potential (GWP) gases**
9. **Expanded district heating**

Agriculture, Forestry, and Waste Management

1. **Implementation of the State's *Solid Waste Management Plan***
2. **Conserve and enhance carbon sequestration levels in Connecticut's forests and fields**
